

SAP Support Assessment Summary

The SAP Support Assessment involves an on-site audit by a leading SAP expert, and delivers an independent report, specifically on their findings at your organisation. It will detail:

- situation analysis of your current SAP support environment
- strengths and weaknesses in current arrangements
- risks posed around business continuity and protection of your investment
- where the opportunities are for improving business performance and cost savings
- a summary, next steps and business case validation for potential cost savings.

The assessment will cover all areas that help you get more from your SAP applications. It is designed for organisations seeking to identify cost savings and/or improve performance from their existing SAP applications.

Previous assessments have covered and highlighted improvements in:

- application development
- system health checks
- load monitoring
- quality assurance
- upgrade planning
- system administration
- data reconciliation.

The Assessment is a part of the Affinity for SAP Service, a partnership between Attenda and Bluefin Solutions, the UK's largest dedicated SAP consultancy.

SAP Support Assessments are now available for a limited time on a complimentary basis. If you would like to find out more about what is involved or discuss an assessment for your own organisation, simply reply to my email or drop me a line at:
