

## Senior BI & HANA Consultant (Data)

We have an open role in our SAP HANA & Business Intelligence Centre of Excellence (CoE) for a consultant with demonstrable skills and experience in SAP HANA BI, Analytics, & Data. The successful candidate would be expected to help develop this growing area of work within Bluefin, working with some of our biggest global clients to shape their capabilities in this space. The role is a mixture of technical and functional consulting, with some business development when required. The candidate should be adaptable and “self-starting”, and able to take the initiative to learn new technologies and approaches. It is expected that the candidate would help shape the direction of the CoE in the BI HANA Data space.

### Duties and responsibilities

You will be involved in interesting and varied projects, working with an exceptional group of consultants with plenty of opportunities to increase your skill set. Initially the majority of the work will be high level design and implementation of Business Intelligence solutions from SAP’s broad suite of BI applications (traditional, and HANA-enabled), but there will be opportunities to develop your skills in other areas – such as BI strategy and performance management. The majority of work will be based on client sites, helping them with their BI challenges, however there will also be the opportunity to get involved in a number of internal initiatives and Sales activities.

You will be part of a diverse, highly-talented, multi-disciplinary team, solving some of the most interesting and future-focused problems within Manufacturing. Your proven approach to creating innovative solutions is therefore key, as is the ability to communicate brilliantly with other consultants with different skillsets such as Customer Relationship Management, EPM, and ERP.

#### Reports into:

HANA Lead

#### Location:

UK based with travel

### Skills and experience

#### Mandatory skills

- Strong product knowledge of SAP BI products and SAP BI Certification.
- ‘Real world’ SAP HANA Experience (At least one project).
- BW/4HANA & S/4HANA Embedded Analytics.
- Utilisation of SAP HANA to realise Data Lake Concepts.
- SAP Analytics & BI Solution Architecture methodology
- Experience of client-facing consulting experience.
- Team leadership and project management experience with onshore and offshore teams.
- Good communication skills.
- Effective problem-solving.
- Extensive experience in SAP Data Services, Data Integrator, & other tools used to harmonise & map diverse data sets.

#### Desirable skills

- SAP Business Objects including BI4.
- SAP Analytics in Cloud.
- SAP Leonardo.
- SAP ABAP Development Skills (OO & BW ABAP)
